Long ago there were many animals on the earth. But now we can't see some of the animals because they have died out (灭绝). Some animals died of natural disasters(死于自然灾害). But some died because man did bad things to Nature(自然界). People cut down trees and built tall buildings. So some animals had no food to eat, no homes to live in and no clean water to drink. Man killed animals, too. Now some animals are dying out, such as pandas and Tibetan antelopes(藏羚羊). If we don't want the animals to disappear(消失) from the earth, we should protect (保护) Nature and the animals.
