It is possible that in 50 years the only tigers in the world will be in zoos. One hundred years ago, there were maybe 100,000 tigers in the world. Today scientists are not sure how many are left, as it is difficult to count them. There are maybe only between 5,000 and 7,000 tigers in the world.

People only find tigers in Asia and Africa. They have already **disappeared** from many countries. There are no longer any Caspian tigers. They died out many years ago. The living condition of tigers in other parts of Asia is also serious. There are perhaps only 100 Chinese tigers left. In southwestern Russia, the number is a little higher. There are about 450 tigers left. On some islands in Sumatra(苏门答腊) with many thick forests, there are about 500 tigers.

Why are there fewer and fewer tigers? The first reason is that tigers are meat-eaters. They need a lot of land to find enough food. Also they live in forests and people cut down many trees. Many years ago, tiger shooting was a sport, especially in India. Local people sometimes kill tigers because they kill their cows. Another reason is that Chinese people use all parts of the dead tigers for traditional Chinese medicine, including the bones(骨头) and so on. People think this medicine will make them live longer.

- () 61. People can find tigers in _____.
A. Europe B. America C. Australia D. Asia
- () 62. The underlined word "disappeared" means _____ in Chinese.
A. 离开 B. 出现 C. 消失 D. 保护
- () 63. One of the reasons why there are fewer tigers today is that _____.
A. people need forests for their cows B. tigers like living in the zoos
C. there are fewer forests for tigers to live in D. people still kill tigers for sports today
- () 64. Which is TRUE according to the passage?
A. There are some thick forests on some islands of Sumatra.
B. People only use some parts of the tigers for Chinese medicine.
C. There were only 5,000 tigers in the world one hundred years ago.
D. Scientists think that Chinese medicine make people live a longer life.
- () 65. What's the main idea of the passage?
A. People should kill tigers. B. How to save tigers?
C. Why are there fewer and fewer tigers? D. The number of tigers is growing.

六、读写综合(本大题分为 A、B 两部分,共 20 分)

A. 信息归纳(本题有 5 小题,每小题 1 分,共 5 分)

请阅读以下关于野生动物的新闻报道,完成后面的信息卡。

Animals are people's friends. But many wild animals are facing the danger of dying out, because the environment where they are living has changed greatly. For example, their living area has become smaller and smaller because of the development of cities and pollution. They have no room to live in except zoos. And many of the wild animals now can't find enough food to eat. At the same time, people kill animals just for their skin, teeth and meat.

People should realize how serious the situation is and something should be done to protect the animals. We are supposed to set up some nature reserves(自然保护区) so that animals can live freely. If we don't take actions, the situation will be more and more serious.

Information Card

The danger many wild animals are facing	81.	
The reason why wild animals' living area has become smaller and smaller	82.	
The place wild animals can live in now	83.	
The things that people kill animals for	84.	
The place we are supposed to set up to make animals live freely	85.	

B. 书面表达(本题 15 分)

假如你叫李华,你看了上面的新闻报道之后,请你写一篇 80 词左右的文章,内容包括:

1. 在你们的城市,很多人吃野生动物及其原因。
2. 你对食用野生动物的看法及其原因。
3. 呼吁大家保护动物,创建一个人类和动物都快乐生活的家园。
