**What can you do on the Internet?**

As we know, the Internet is becoming more important to us. We can do many things on the Internet. For example, we can chat online with our friends or family when they're in other cities. We can also send emails to them instead of writing a letter. There are many ways of relaxing, such as listening to music, watching movies and playing computer games. Doing these things can make us relax, but we shouldn't do these things for a long time. The most important thing is that we can learn English on the Internet. Many useful English websites can help to improve your English skills.
