You can travel around the world. You can read and write your own language. But you can't read or write the languages of other countries. How do you find things? Can you read these pictures?

These are picture signs some countries are using. People travelling in the faraway places can read these pictures. The signs help them find what they are looking for. Picture signs are not new. We believe cavemen (穴居人) painted pictures on walls to tell about great hunts (打猎). They made picture signs for the sun and the rain. Like people in the past, we use picture signs, too. We use them on our roads. We use some on our buildings and inside them. But different signs are used in different countries. Someday the same signs for the same things may be used in all countries. Then people will find it easy to travel in other countries.
