Boys and girls, it's ten o'clock now. It's time for us to have a break. Here comes "The voice of the school". I think you must be tired after class. What do you think of listening to music at this time? Music can help you be more active. And listening to music can help you relax. It's true that we can learn better when we're relaxed. Music can help you forget all the problems. So it's really helpful for your next class. You and your classmates must be very happy to hear your favorite music. You can sing and dance to music. Scientists believe that the

sound of western classical music makes people feel richer. Fast music makes people do things faster. Isn't that interesting? Haha..., but I think most of the middle school students like pop music best. OK, now let's enjoy the most popular song "Baby" from Justin Bieber.
