A good way to pass an exam is to work hard every day in a year. You may fail in an exam, if you are lazy for most of the year and then work hard only a few days before the exam. If you are free, read stories in English. Speak English whenever you can. A few days before the exam you should go to bed early. Do not go to bed late at night studying. Before you start the exam, read carefully over the question paper, try to understand the meaning of each question. When you have at last finished your exam, read over your answers. 五、读写综合。（25 分）

A. 信息归纳。

Everybody knows if you do not use your arms or your legs for some time, they become weak; When you start using them again, they become strong (强壮) again. Yet many people do not seem to know that the memory (记忆力) works in the same way.

When someone says that he has a good memory, it means that he keeps his memory active by using it. When someone else says that his memory is poor, it means that he does not give it enough chance to become strong.

If a friend says that his arms and legs are weak, we know that it is his own fault (过错). But if he tells us that he has a poor memory, many of us think that it’s his parents’ fault, and few of us know that it is just his own fault, too.

Have you ever found that some people can’t read or write but usually they have better memories? Because when they cannot read or write, they have to remember things like days, names, songs and stories. They exercise the memories all the time.

So if you want to have a good memory, keeping practicing.
