Experts say that students usually need eight to ten hours' sleep at night, but most Chinese students do not get enough sleep. Once a mother told us that every morning her 10-year-old boy put up one finger with his eyes still closed, begging(请求) for one more minute to sleep. Like thousands of students “ **early birds**” in China, he has to get up before six every morning.

A report shows that without a good night sleep, students seem to be weaker (虚弱) than they should be. Many students have fallen asleep during class at one time or another. Too much homework is not the only reason why students stay up late. Some watch TV or play the computer games late into the night.

Experts have ever said that the students should develop good study habits. So some clever students never study late, and they are able to work well in class.
