63. safety 64. landed 65. quickly 66. if/whether 67. be punished

七、书面表达 (共 15 分)

One possible version:

Dear schoolmates,

There's no doubt that students should play a role in creating a green school. To make our school green, we students should do something. The first thing we need to do is keep the school clean. Put the rubbish into the bin and always remember to classify the rubbish. Secondly, we should make good use of paper. To save paper, we'd better use both sides of the paper and share our old books with others. What's more, it's necessary for us to save energy at school. Save every drop of water and turn off lights the moment they are not being used. Last but not least, when we are in the dining hall, make sure the food is eaten up.

Little things will make a big difference. Let's start now and do a little bit every day to build our green school!

Students' Union
