B

In my early childhood, I was often surprised when I saw my father making a small number of money with difficulty. Being a child, I was unable to understand him. When I was older, my father started doing a part-time job at home. He used to bring some work back and work till late night.

I can't forget he played with me when I was 3-4 years old. He taught me how to read when I was at the age of 5. He took care of me all night when I was sick. Whenever I fell down, he would cheer me up. He also cared about my lessons and often helped me get ready for examinations. Later he sent me to New Delhi for the best education. Whenever I needed money, he never refused. He always managed money for my studies.

Two years ago, I got a job at a hospital in New Delhi. When I helped my first patient, I got a strong feeling of satisfaction. When I got my first salary which was about ten times more than my pocket money, I spent it all on myself.

When I returned home one fine morning, I heard my father communicating with one neighbor. He was telling him my success in the job very proudly. He also told him that I had a higher salary than him at the end of his work. A dream his son should become better than himself came true.

I was unable to move on my feet. Past 23 years flashed into my mind in a moment. I knew my father loved me very much. I could understand the meaning of my father's aspirations. I could understand the decisions my father made in the past. The financial difficulty he was facing was decided by his goal making his child more successful than himself.

If today I am successful, this is because of my father.

Do you know any people like these? They are part of a new addiction called Internet addiction. Internet addicts spend at least thirty to forty hours online every week. The use of the Internet can be an addiction like drug use. People lose control of the time they spend on the Internet

For example, one college student was missing for several days. His friends were worried, and they called the police. The police found the student in the computer lab: he was surfing the net for several days straight.

Studies show that about 6 to 10% of Internet users become addicted. And people worry about the teens because the Internet is changing the playing field for some of them. They spend more time in cyberspace than in the real world of friends and family.
