My name is Kate. I will finish my middle school life in a few months. I like making things in my free time. I have been interested in it since I was three years old. As soon as I could read, I read books about robots. Last week, with the help of my father, I made a model plane and it could fly! I want to be an inventor when I grow up. I'd like to invent a robot to help old people in the future. The robot will be able to play chess and take exercise with old people. When they are sick, the robot will take them to hospital. In order to realise my dream, I must work hard for it. I make up my mind to study science and maths well so that I can break into the world of robot engineering. They are not easy but very useful. Second, don't bring any food or drinks into the lab. We should keep the lab clean and tidy. Third, when we enter the lab, we need to wear special clothes and glasses. #### Waste Sorting in My Life

In Hefei, more and more people get to know it's important to sort the waste now. My life has changed a lot since I understood the importance of waste sorting.

I used to litter and waste resources. Now I've learned it's necessary to throw rubbish into different bins. I often discuss with my classmates how to classify waste better. We often go to the park to collect waste on weekends. I think waste sorting can reduce the amount of waste. What's more, it can recycle resources, and it is good for the environment.

Since waste sorting has so many advantages, we should put different dustbins in public places so that people can leave their sorted waste into them.
