Hello everyone! I'm Peter. Last Friday was the Dragon Boat Festival. I went to the river near our city. It's about fifteen kilometres away from our city. I used to swim there with my uncle. He often drove me there and taught me how to swim. And later he also taught me how to fish there. Last Friday, I watched a wonderful boat race there with my father. He told me it's one of the wonderful activities on the Dragon Boat Festival. At last, the eighth team won the race. And the television reporter reported them on TV. They were all very excited. On that day, everyone put some special leaves at the door. We also ate some delicious sweet rice dumplings. I like them very much. In the evening, we also enjoyed an interesting movie. What a happy day we had!

Homework is a big problem for many students. Luckily, here are some tips for you to make homework easy.

First, you should make a homework plan. Most middle school students usually spend two or three hours doing homework a night. It is a good idea to come up with some kind of homework schedules, especially if you are going to do sports or other activities after school.

Second, you should watch where you work. A bedroom, study or any room where you can get away from noise is good for you to do your homework. But don't study on your comfortable bed, or you might fall asleep there, so a bedroom or a study is a good choice.

Third, you should take a break every hour. Most people's attention doesn't last very long, so take some breaks while doing your homework. Taking a 15-minute break every hour is a good way for most people.

Last, you should get help when needed.

Sometimes even though you are listening carefully in class, some subjects seem too hard. The first person to ask for help is your teacher. He or she may be able to work with you before or after school and explain things more clearly. Your classmates may also be able to give you a hand.

One possible version:

Go green at school

Hi, guys,

Isn't it pleasant to study in an environmentally friendly school? To develop a green lifestyle, we students can go green at school in smaller ways.

We can do simple things to help save resources. First of all, reuse the textbooks and use both sides of the paper. Second, it's a good idea to save water. Let's not keep water running while we don't use it. Also, remember to turn off the lights when we leave the classrooms. Next, don't order more food than we need. Try not to use one-off paper cups or chopsticks to save wood.

Besides, we should take care of the trees and flowers. Walk or ride to and from school if possible. If your home is far from school, you'd better take a bus. Many hands make light work.

Boys and girls, let's put these ideas into action from now on. I'm sure our world will be more beautiful.

That's all. Thank you!
