(一)参考范文:

### Protecting Our Environment

The earth is the only home for humans, but now it is badly polluted. The environment is becoming worse and worse. We can't breathe the fresh air or drink clean water because of different kinds of pollution. People cut down forests and kill lots of animals for food and money, so many animals are endangered. Factories and people are throwing waste and rubbish everywhere. If we don't stop these, humans will die one day. So protecting environment is protecting ourselves.

As a middle school student, we can do many things to protect our environment. First, we can take the bus or subway to school, and if our school isn't far, we can also ride a bike instead of riding in cars. Second, when we go shopping, we should bring our own bags. We shouldn't use plastic bags or throw rubbish. When we leave a room, please remember to turn off the lights. Third, we must put the waste to good use. We can reuse or recycle the books, paper, clothes and so on that we don't need anymore. I believe nothing is a waste if we have a creative mind. Fourth, we are supposed to make friends with animals rather than kill them for food and money, remember "No trading, No killing". Lastly, we should write to the government and ask them to develop laws to protect our environment. We should also teach the public about the importance of environment.

protection.

Everyone should play a part in protecting our environment. So together, our actions can make a difference and lead to a better future.
