In Hong Kong, most schools are very strict about what students wear to school. For example, they do not allow students to wear any kind of accessories, such as necklaces or earrings. Some people argue that small items, like simple earrings, should be acceptable. However, I feel that students should not be allowed to wear any kind of accessories to school.

Firstly, if students are allowed to wear accessories to school, they will be less focused on their studies. Instead of discussing schoolwork, they will spend time talking about accessories. For example, things like the latest trends or where to find them. Besides, if students are allowed to wear accessories to school, they will probably spend a lot of time reading fashion magazines and shopping. As a result, they will spend far less time on homework and revision.

Another reason why I think accessories should not be allowed in school is that they can be very costly. Even if students choose not to buy designer accessories, they may still spend a lot of their pocket money on them. This is because there are many types of accessories available and they would probably want several items of each.

All in all, if students are allowed to wear accessories to school, it will distract(分散) them from their studies. In addition, it will cost them a lot of money. Therefore, I believe that students should not be allowed to wear accessories to school.

23. Which of the following things are accessories?

### A. Rings

## B. Sweaters

### C. Shoes

#### D. Uniforms.

24. How do students probably get the information about new accessories?

A. By discussing schoolwork with friends.

B. By chatting with some designers online.

C. By reading fashion magazines and shopping.

D. By entering a school for only designers.

25. What is the writer's purpose of writing this passage?

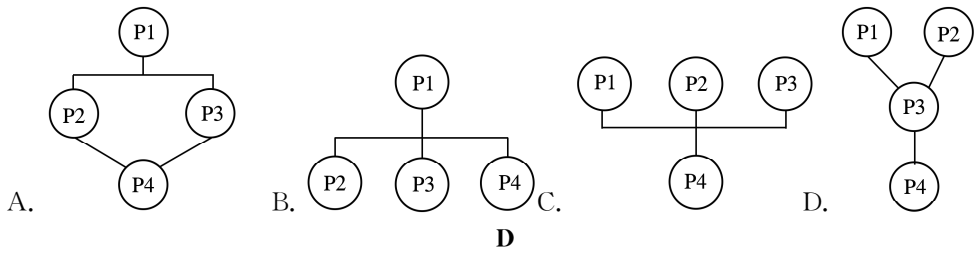

A. To show different opinions towards whether students can wear accessories to school.

B. To argue why he thinks students should not be allowed to wear accessories to school.

C. To describe what accessories students are wearing to school in Hong Kong these days.

D. To advise more and more students in Hong Kong to wear simple accessories to school.

26. What is the structure (结构) of this passage?
