Yuan Longping is a great scientist. He is the first person to develop a kind of hybrid rice(杂交水稻). This helps fight hunger(饥饿) in China.

Food was a big problem in China in the past. This was because China had 22% of the world's population(人口), but only 7% of its farmland. In the 1960s, many people died because they had no food to eat. As an agronomy(农学) teacher, Yuan was very sad to see this. Then he decided to work on a kind of hybrid rice. It has a high output(产量).

In 1973, Yuan and his team grew a new kind of hybrid rice. This rice is strong. Farmers can grow it in many different kinds of farmland and also in bad weather. It can also fight disease. Its output was much greater than common kinds of rice. With the new kind, about 70,000,000 people could have food every year!

It makes us really sad that Yuan died on May 22nd, 2021. Yuan is our hero and all of us are proud of him. As students, we should learn from him and try our best to study hard.

53. Why was food a big problem in China in the past?
A. Because farmers didn't grow rice.
B. Because farmers didn't have rice seeds(种子).
C. Because China had no money to buy lots of food.
D. Because China had a large population but a little farmland.
54. How did Yuan Longping help people have enough food?
A. He discovered another kind of food.
B. He borrowed enough food from other countries.
C. He developed a kind of hybrid rice with his team.
D. He started being an agronomy teacher to study rice.
55. What does the underlined word "common" mean in the passage?
A. 普通的 B. 奇怪的 C. 美味的 D. 特别的
56. Which of the following is NOT mentioned(提到) about the new kind of hybrid rice?
A. It is able to fight disease. B. It is grown across the world.
C. Its output is much higher. D. It can be grown in different farmland.
