More and more cars are on the streets now. At the same time, many driving apps also come into our life. Now driving is very different.

But a direction app may make it not easy to find the place. Sometimes the direction app tells you to turn left, but there's no way. It says you need to make a U-turn, but there is a sign telling drivers not to make U-turns. That makes drivers miss the paper maps in old days.

An app is helping with directions, but you need to know something about the roads. There is a man who is driving in a new place. He doesn't know the way well, so he opens his direction app and wishes that can help. But some minutes later, he and his car are in the river! The app tells him to drive on a broken bridge. He sits in the car, and calls 119 for help. So you must know where to go first and know more about the roads before going out. Don't always follow the apps.

Of course, everything has two sides. Because of the apps, most drivers can drive their cars more easily. The direction apps can not only show drivers the right ways, but also help them do many other things. They can tell drivers which road doesn't have many cars, when to drive fast or not, and where there is a camera(摄像头).

71. To know the directions, which of the following did drivers like to use in old days?

A. Watches.

B. Paper maps.

C. Direction apps.

72. What can we know from the second paragraph?
- The direction apps can help drivers find their ways.
 - The direction apps don't always tell the right way.
 - Old drivers can't use the direction apps.
73. Why does the writer talk about a man in the third paragraph?
- To tell us not to follow the apps all the time.
 - To ask us to call 119 when we're in danger.
 - To show us how funny he is.
74. How many things can the direction apps do for drivers according to the reading?
- Four.
 - Three.
 - Two.
75. Which of the following can be the best title?
- Stop using the direction apps.
 - Direction apps go into people's life
 - Direction apps: Are they good or bad for drivers?

Dreams are often mysterious(神秘的). One day, a man named Zhuang Zhou has a very interesting dream. 1 Flying around, he can do anything he wants. How happy and carefree(无忧无虑的) he is! He forgets that he is a man.

Then he wakes up from his dream and finds he is a man.

"Who am I, indeed(到底)?" he asks himself. "2"

At last, he says, "Maybe I am a butterfly. In my dream, I become a man and my name is Zhuang Zhou."

Zhuang Zhou and butterflies

Zhuang Zhou lived more than 2,000 years ago. We also call him Zhuang Zi. Zhuang Zi loves nature and freedom. He thinks that people and animals should be treated equally(平等地对待). 3

One day, Zhuang Zi and his friend take a walk along the river. Zhuang Zi says, "Look at the fish! How happy they are!" His friend asks him, "You are not a fish. 4" Zhuang Zi smiles, "But you are not me. How do you know that I don't know the fish's feelings?"

Faster warnings for earthquakes

Chinese scientists have made an AI system that can give early warnings when earthquakes happen. In the past, it took three to 10 minutes to know where the aftershocks(余震) would be after a quake. This was not fast enough for people to do something to get away from danger. The new AI system can sound alarms within just one second. This will save lots of lives. The system is being tested in Yunnan and Sichuan provinces.

Cold can make our teeth hurt

Have you ever had a toothache(牙痛) while eating ice cream or drinking something cold? Scientists can tell you why. It is because of a protein(蛋白质) called TRPC5. It can feel the cold and give warnings to you.

There is more TRPC5 in bad teeth. So people with bad teeth are more sensitive(敏感的) to cold food and drinks. Now you have another good reason to brush your teeth the right way!

Finding DNA in the air

When the police try to work out a crime, they sometimes use DNA from criminals. These days, scientists at Queen Mary University of London have found for the first time that we can get DNA from the air. This new finding could help the police work out crimes in the future. It can also help scientists do more study, such as studying ancient(古老的) animals.
