Passage 2

The home appliance (电器) may change in the future. The television can talk to you when some parts of it will not work. So before it stops working, the television itself may let you know it has a problem. Your television can also tell you what is inside it. So you don't need to stand in front of it to look for what you want. It is the computer chip (芯片), called RFID that makes this possible. We can put it in all the equipment (设备) in our house.

Other equipment in your house will be convenient (方便的) because of the chips. The washing machine will know how to make dishes cleaner. And you will be able to use your oven (烤箱) with your mobile. Put your dinner into the oven before leaving home. When you go to a store, the chips will also help you a lot. The chips will charge your credit card so that you won't be tired to wait for a long time before the cash desk.

If you love all the things today's equipment can do for you, you will love what tomorrow's equipment will do for you.

53. In the future, _____ will talk to you if your television has a problem.
A. your family B. someone else C. the appliance D. the television
54. The underlined word "it" refers to(指代)_____.
A. the mobile phone B. the computer chip C. the equipment D. the machine
55. The equipment with the chips in it will be more _____.
A. different B. Important C. convenient D. difficult
56. Which of the following is Not true?
A. The chips will make the television work longer.
B. The chips will help washing machine make dishes cleaner
C. The chips will make the oven work through the mobile phone.
D. The chips will charge your card and you needn't wait for a long time.
57. What's the best title of the text?
A. People like the chips very much B. The future of the home appliance
C. People love today's equipment D. The change of the computer chips

B.阅读下面语段，根据内容，回答下列问题。
