### 四、阅读理解 (共 10 小题: 每小题 2 分, 满分 20 分)

阅读下面两篇材料, 然后从各小题所给的 4 个选项中选出最佳选项。

#### A

Let me tell you about a young boy who made a model car all on his own. The boy is me, six years ago when I was just 11. The car was small and simple, but in my imagination it was a high-speed racing car, speeding along the race road.

It was during the school summer holidays and workmen were building a new driveway and garage(车库) beside our house. It meant to add something new to our home. When I watched the workman, I came up with an idea--I would build a car to drive into the garage in celebration of it. I told my mother and began with my plans. But I couldn't find the right things for making the car, so I gave up and sadly spent several days doing nothing. My mother noticed that I had stopped working and asked me why. I explained and she suggested that maybe I should change my plan to fit the things I had, rather than give up.

And that's just what I did. I found small pieces of wood in my father's workshop and made my car from anything that was lying around the house. When I found a small engine(发动机) from one

of my old model planes, I added that. The power came from a battery(电池) I found in a box.

By the time the garage was finished, so was my car. I called my family together outside the house, started the engine and put the car on the driveway. It was fast, and I had to run to the garage to prevent it from hitting the new door. My family began to cheer and I smiled proudly. Thanks to my mother I learned the value of continuing to do things, especially something difficult. Soon I was making plans for my next project: a robot!

B

Five years is enough to compare yourself now and then. I have changed in many ways in the last five years.

Firstly, there is a change in my thinking. Five years ago I was childlike(孩子似的). I believed that the world was a place without problems. I thought that I would always have time for games and friends. Also, I was sure that if I had any problems my parents would always be around me. Now I have realized that sometimes there are problems in life that you have to deal with. Though I still believe that the world is a great place for living. What's more, I know that sometimes, you have to deal with these difficulties alone. This change in my thinking makes me more responsible and serious than five years ago.

Secondly, there are some changes in my interests. Now I spend less time with friends and I am studying for exams. Five years ago it wasn't so. I believed that there was nothing more important than playing football or watching cartoon movies.

Although I have changed in some ways, some things remain the same. For example, I still believe that making friends is not a waste of time, And I am sure that childhood is the best time in our life.
