How to Be a Greener Person

The environment pollution is becoming more and more serious. We can see white pollution everywhere. There has been hazy weather in many parts of China in recent years. I suggest that we should try to take a bus or the underground instead of driving by ourselves. We should prevent factories from pouring the waste into rivers to reduce water pollution. We shouldn't use disposable plates, bowls and so on. We should plant more trees and grow grass to prevent it. We should also prevent people from cutting down too many trees. If we try our best, the environment will be better and better.
