M/W: As the pollution of the earth is becoming more serious, many students are trying to do something to stop it. They join our environment club. In the club, we work together to make the environment clean. Here are the activities we do in the club:

No-garbage lunches: How much do you throw away after lunch? The environment club asks students to bring their lunches in bags that can be used again. It may reduce the waste we produce every day.

No-car day: On a no-car day, nobody comes to school in a car. The students who live far can ride their bikes to school. Riding bikes can not only be good for our health but also help stop air pollution.

Saving water: Save every drop of water. Do you know some washrooms can waste more than thirty tons of water a day? In a year, that would fill a small river! So turn off the water immediately when you are not using it.

Come and join us as a member of the club. Enjoy the activities and try your best to care for the earth.

Dear Sir or Madam,

I'm a high school student. I've learned from the local government website that your company will build a factory in my hometown. People in my hometown welcome the factory. We are sure that it'll certainly supply more jobs, and it's good for the development of my hometown.

However, I am worried about the possible environmental problems caused by the factory. Will it make much noise or pollute the environment? I'd like to know if you have any measures or plans for the environmental protection. Would you please offer more information about it?

I'm looking forward to hearing from you.

Yours sincerely,
Li Hua
