C

Despite missing out on the podium, Yuzuru Hanyu deserves the utmost respect for his Beijing 2022 campaign.

In a last-ditch attempt to salvage a medal, the “Ice Prince” took on figure skating’s most difficult jump-the 4 1/2-rotation quadruple axel. The 27-year-old under-rotated and stumbled upon landing. He fell again attempting a quadruple salchow before performing the remainder of his routine cleanly.

Taking a bow to loud applause and touching the ice before stepping off the rink at the Capital Indoor Stadium, the two-time defending champion cut a lonely figure sitting by himself as he awaited his score, intensifying the feeling that this could have been his swan song.

The judges scored him 188.06 points-good enough for third place in the free skate but fourth overall. He could only manage eighth in Tuesday’s short program after missing a quad salchow near the start of his routine. He raised the bar for the Beijing Games, challenging himself to complete the quad axel in a bid to claim a third straight singles crown. But it wasn’t to be.

“It was a hard time for me on the ice. If I wasn’t doing the quad axel, I could have done a better combo. But that was my target. It felt more complete to attempt it. That’s why I did it,” Hanyu said. “As for whether I will continue to attempt the quad axel, I think I need more time to consider. This time I have tried my best.” Hanyu’s bravery earned the respect of his younger rivals.

五、阅读填空。（共 20 小题，每小题 1 分，计 20 分）

A. 阅读下面短文，根据短文内容完成表格中所缺信息，每空一词。

What do you think of “Double Reduction” policy?

These days, the central office of CPC put forward measures to implement (实施) double reduction policy. It is required to reduce students' excessive homework burden, make the after-school service level of the school better, and develop the quality of education and teaching in the school.

Some people think that when it works, it can promote the all-round development of students. It can avoid short-sighted and utilitarian (功利的) education, return spare time to students, and cultivate (培养) students with morality, intelligence, physique, beauty and labor. After school services can effectively solve the problems of parents' difficulty in picking up and seeing off and children having nowhere to go. It can make full use of after-school time, provide rich and colorful service contents, and provide students with learning and development space.

However, some people have different thoughts. Students' job is to study. Without grades, how can they have a future? Do the loopholes in the quality education (素质教育) in the West reflect the disadvantages? Western students have a carefree childhood, which leads to bad marks. Some students will use this chance to indulge themselves and become lazy. If you can't master the basic knowledge, how can you improve it? The high school entrance examination is cruel, and the reality is cruel too.

Each coin has two sides. We should see the advantages and disadvantages in it. The best way is to develop students' good habits. Grasp the basic knowledge and provide them with an independent space!
