本题你将听到一段独白，读两遍。请根据独白内容，用所听到的单词或短语完成下列各题。

(每空限填一个单词。)

Have you ever dreamed to travel in the space like an astronaut? If your answer is yes, you'll be happy to hear that the world's first space hotel will welcome people by 2022. The space hotel plan was developed by a company in the U.S.A. It will serve six people at a time, including two space men for a twelve-day trip of space travel. The hotel will move around about 213,800 meters above the earth and fly around our blue planet every 90 minutes. The station itself will be about 10 meters long, and 4.2 meters wide, or about the size of a small private plane. Guess in the hotel we will be able to watch the sun rise 16 times every day and take part in research experiments. They can also have video chats with their family and friends on the earth. Then how much does this amazing travel cost? It will be at a very high price--9.5 million dollars. And the future guests will need to have a three-month training before going into the space.
