You must have remembered the story from your childhood: an old man was worried about his sons who were always arguing among themselves. In order to teach them a lesson, he asked them to break a bundle(捆) of sticks tied together. Clearly, none of them could. And when the bundle was untied, they were able to break each stick easily enough. Why? This is because of the power of unity(团结).

The power of unity is known to all of us. But we often seem to forget it when it comes to individual(个体的) success. Most of us consider our success as a personal thing, and it has nothing to do with others.

Dr. John Maxwell, in his book *Success Journey* says that success is not a trip that you take alone. But it is something that you take with your family and your friends. Think about it—if at the end of all the achievements, you find yourself alone, will you call it success in a real sense?

Your dream and your success do not belong to you alone. Even though you work hard towards your dream, there are people who are working behind to make sure that you are able to give you a hundred percent. For example, you are studying in school so that you can have good education; your parents are working hard to pay for the cost and provide something you need for you.

Do you think that it is possible without unity? Don't you feel that these people are doing their best so that you can be successful? And so, unity plays an important role, even if you are talking about your personal success. So, it is your responsibility(责任) to keep unity if you really want to be successful in life. Only if you always treat things and people in your life seriously, will you succeed because all the things and people around you have connections in some way.

66. Why did the father ask his sons to break a bundle of sticks?

- C. your parents are working hard
- D. your parents provide something for you

70. The best title for the text is "_____".

- A. The Power of Unity
- C. The Meaning of Life

① Visiting outer space is still a far dream for anyone who isn't an astronaut, but a day trip to the stars is already open for people to order!

② A new company (公司), Space Perspective, is planning tests with passengers. It has big plans to run up to 500 flights from different places across the USA by 2024. If successful, reaching the outer side of space could be as easy as flying abroad in a few years' time. The plan will be for spacemen and up to eight passengers to travel in Neptune, a capsule (太空舱) tied to a balloon.

③ They will move slowly upwards right to the side of space, 30 km away from the Earth. There, space tourists will be able to look back at the Earth and out to dark space and the sight of millions of stars. Although the price is yet to be fixed, the expensive flight, which will take six hours, cost over £100,000. Because the capsule remains within the Earth's atmosphere (大气层), no special clothing or training are needed. It means that older people or those with health problems will be included.

④ One problem may be the method of landing back on the Earth. The balloon moves back down from space until it falls down in the sea. Passengers, spacemen, capsule and balloon are then gotten back by ship.

⑤ Now Neptune faces competition from the Stratollite, a balloon being developed by a company called World View Enterprises, while the super-rich Richard Branson, Jeff Bezos and Elon Musk are all pouring money into developing business space flying machines. The advantage of the balloon is that it will be cheaper than a space plane or rocket.

⑥ Space travel may soon be a reality (现实), but how visitors get there is still a very open question.

71. According to paragraph 2, Space Perspective _____.

- A. has quite a long history
- C. makes it easier for us to fly abroad

B. has run up to 500 flights

D. wants to use Neptune to carry people

72. What do we know about space tourists from Paragraph 3?

- A. They can watch the Earth from space.
- C. They should be trained specially.

B. The flight will take them eight hours.

D. They must keep in good health.

73. What's the main idea of Paragraph 5?

- A. The race to get tourists into space is becoming hot.
- B. Only rich people are interested in business.
- C. The Stratollite is popular with space passengers.
- D. Richard, Jeff and Elon has little money.

74. Which of the following is an opinion?

- B. A new company, Space Perspective, is planning tests with passengers.
