Communication is essential (必要的) in our daily life. But do you know how to build good communication? Here is some advice:

Listen and Ask Questions of Others

Listen to others, ask questions and be truly interested in your workmates. This will lead to everybody being more open with each other. The more interested you are in others, the more they will share with you and open the door to a closer relationship.

Share Yourself

It is helpful to share more about yourself. You can share your personal stories and interests. As you share, others will also share more as well. And you can begin a positive share loop (正能量循环) where you are building relationships with others.

Ask for Feedback (反馈)

We can avoid our blind spots (盲点) by asking for feedback. Blind spots are things about ourselves that others can see but we cannot. The more we're open to feedback, the more we can know and manage ourselves.

Accept Others and Yourself

Accepting others' bad habits builds relationships. It also helps you to be better accepted by others as well.
