VIII. 阅读短文, 判断下列句子正(√)误(×)。(10分)

There are four seasons in a year in China. March, April and May make the spring season. June, July and August make the summer season. September, October and November make the autumn season. December, January and February make the winter season.

Near the North Pole (北极) there are four seasons, too. But the winter season is very long. It is from November to April of the following year. The nights in winter are long, too. For more than two months you can't see the sun, even at noon. In summer the days are long. For more than two months the sun never sets down (降落), and there is no night.

- () 1. In China, October is in the autumn season.
() 2. There is only one season near the North Pole.
() 3. Near the North Pole, the nights in winter are very long.
() 4. The sun never sets down near the North Pole.
() 5. There is no night for more than two months in summer near the North Pole
