九、阅读表达(共5小题,计10分)

根据短文内容,回答下列问题。

Giraffes are smart and friendly. They have long legs and necks (脖子). They are so tall that they can grow up over 5 meters. So how do they sleep or drink?

You may think it's difficult for them to sleep, but they have no such problems because

giraffes don't often stop for a sleep. Giraffes just need to sleep about thirty minutes a day. When they sleep, they don't always lie down (躺下). They usually sleep for minutes at a time because it's difficult for them to get up again. And it's a great danger to sleep in the wild (荒野). But the giraffes in the zoo sleep for about four to six hours every day. They usually lie down when they sleep.

Drinking water is a big problem for giraffes because their long necks are too "short". To drink water, they must spread (伸展) their long legs in a difficult way. And in this way, other animals like African big cats can easily hunt them. So they usually get most of their water from the trees and flowers. Giraffes don't need to drink water very often. They can even drink no water for months.

86. What do giraffes look like?

87. How long do giraffes just need to sleep a day in the wild?

88. Why do they usually sleep for minutes at a time?

89. 请将划线处译成汉语。

90. Where do they usually get most of the water?
