"Please help me find the Rh AB negative blood (熊猫血) for my father!" Miss Huang from Wuhan asked for help on Changjiang Daily on July 21,2019. Her father was over 70 and he was in a serious situation when she took him to a hospital.

He needed an **immediate** operation (手术), or he could lose his life. However, there was no Rh AB negative blood for him. The doctors had to put off the operation.

"An old man with Rh AB negative blood is in great danger. We need such blood for his operation!" Shen Juan who works in the Wuhan Blood Center called out the volunteers in their public QQ groups. He checked their information on the computer and called them one by one. Yu Zhou was doing housework when he received Shen's call at nine o'clock at night. He went to the center and donated(捐献) 400 ml of blood at once. Wang Bing was at work when he picked up the

phone. As soon as he finished working, he went to donate 400 ml of blood as well. Xu Huijun donated 200 ml. Tan Peng and Lu Juanzhi also donated their blood in the closest blood center.

By July 22, the five volunteers donated 1,600 ml of Rh AB negative blood after passing examinations. The doctor had an operation on the old man soon.

Just three percent of people own Rh AB negative blood. Wuhan Blood Center set up three QQ groups for volunteers in 2002. They give their blood regularly (定期地) and have helped people in trouble for years.

Do you have a poor eyesight(视力)? If you do, your parents might have tried to do something to fix it such as having you take medicine or get surgery(外科手术). Some people try to offer these services or products(产品) so they say they can treat or even cure myopia(治愈近视).

However, you will no longer see advertisements like this before long. The government will stop businesses(商业机构) from using words like "recovery" or "cure myopia" in their advertisements. The notice says that myopia cannot be completely cured with recent medical technology.

Young people can stop myopia by spending more time outside. They should spend less time in front of books and computers. People who have myopia should go to a hospital and let a doctor decide what to do.

It's reported that more than 450 million Chinese suffered from myopia up to June 2018. 30% of them are primary school students, 60% for junior high students and 80% for senior high students. This is likely because students spend a lot of time reading books and using electronic(电子的) products.

The government made a plan to help. The plan is to control the time of children spending playing video games. As the old saying goes, eyes are the window of the heart. Eyes play an important role in your daily life. If we take them seriously, we can "completely" cure myopia.

- () 65. Why do people say that they can cure myopia?
A. To show their high - level skills.
B. To sell more products or services.
C. To show their care and love to the young.
D. To help people who are nearsighted.
- () 66. What should you do first if you have myopia?
A. Have surgery. B. Get an eye relaxing.
C. Take some medicine. D. Ask a doctor for advice.
- () 67. What's the main idea of the last paragraph?
A. Students should be stopped from using mobile phone.
B. A good way to reduce the myopia rate among the young.
C. A new plan was made to reduce the myopia rate among young people.

- D. Children spend too much time in playing video games.
- () 68. What's the passage mainly about?
A. Saving kids' eyesight. B. Spending less time on computers.
C. The way to cure Myopia completely. D. Avoiding using words like "recovery".

E

When you look at a giraffe(长颈鹿), what do you see? A leopard's(豹) coat? A camel's(骆驼) head and neck? A cow's feet? Or a snake's tongue(舌头)? Why does the giraffe have so many different characteristics(特征)? The giraffe needs all of them to survive(生存).

Giraffes have long necks for two reasons. First, they eat from the tops of very tall trees. Second, they need to see over the tops of the trees. They can see danger, like a lion, from far away. Then they have time to run away or hide.

The giraffe's coat is also important for its survival. It has brown spots and is very thick. The spots help the giraffe hide among the trees. The giraffe's thick coat protects it from the sun.

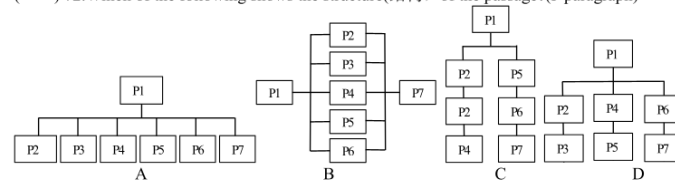

Two other important characteristics of the giraffe are its large eyes and long thick eyelashes. With its large eyes, it can see very well. The eyelashes protect its eyes. The giraffe sees better than most other large animals in Africa.

A giraffe's hard feet and strong legs are also important for self-protection. If a lion comes too close, the giraffe can kick it on the head. That usually kills the lion.

One last characteristic is the giraffe's long black tongue. It is about 18 inches long. With their tongues, giraffes get food far above their heads. They also clean their eyes and ears with **them**. Why is the giraffe's tongue black? The color protects it from the sun.

Maybe the giraffe looks like four animals. But of course we know it is not. It is one animal, with many characteristics. Its characteristics help it survive.

- () 69. Which of the following characteristics for a giraffe to survive is NOT mentioned?
A. Thick eyelashes. B. The long neck. C. Large ears. D. The black tongue.
- () 70. According to the passage, which of the following is RIGHT about giraffes?
A. Giraffes are so tall that they can't hide among the trees.
B. Giraffes have thick coats to protect themselves from the sun.
C. Giraffes have hard feet and strong legs to kill lions.
D. Giraffes always clean their necks with their black tongues.
- () 71. What does the underlined word "**them**" in Paragraph 6 refer to?
A. Giraffes. B. Heads. C. Tongues. D. Colors.
- () 72. Which of the following shows the structure(结构) of the passage?(P paragraph)
