Stampedes(踩踏), earthquakes(地震) and fires are the main accidents at school.

A stampede always happens in crowded places. When students around you begin to push, just stand there and try to hold on to something. If you fall down in the crowd, move to one side and protect your head with your hands and arms.

When earthquakes happen, you can get under a desk quickly. It'll protect you from falling things. If you are outdoors, find a place away from buildings, trees, and power lines.

When there's a fire, leave the classroom quickly. It's better to put something wet over your mouth and nose. In this way, you won't breathe in smoke.
