C

Bats(蝙蝠) are the only flying mammals(哺乳动物)in the world. They can't see very well. People think that all bats are blind(瞎的). People often hear "as blind as a bat". Bats have no trouble flying on the darkest nights and finding their ways around very well. How can bats fly and see at night? They fly by radar(雷达)!

Bats' radar system works the same way as the one that ships and planes use. When bats fly through the air, they make a sound that is too high for our ears to hear. If the sound hits things, it comes back. Bats' ears receive the messages. The messages can tell bats where the things are.

Bats go out to look for food at night. In the daytime they hang in some dark places. Some people treat the bats as bad animals. In fact, they are useful animals.

61. Bats are \_\_\_\_\_ .

- A. birds      B. mammals      C. fish      D. plants
