However, a dishonest prince vilified Qu. Realizing that the country was now in the hands of bad people, Qu jumped into the Miluo River on the fifth day of the fifth month. Nearby villagers rushed over to try to save him but were unable to even find his body. After that, people got to the river by boat and threw rice into the water, hoping that the fish ate the rice instead of Qu Yuan's body every year on the fifth day of the fifth month. What do you do after studying? In fact, it is important for you to learn well and remember new information. Here are two ways that can help you improve your learning — good rest and sleep.

Many students often continue another activity after studying. Perhaps they  use their phones or computers. They might even play a video game or watch TV. But research suggests that rest after you study may help you remember what you have studied. With less activities after the study, your brain gets a chance to rest. Rest is difficult when you have too much exciting game and so on.

A study found that both young and older adults were able to better recollect information from

passages after doing wakeful rest. This study included 45 younger people and 40 elderly adults. If you want to give “wakeful rest” a try, here are a few simple things to do. Rest quietly for five to ten minutes. Do not watch your phone, read stories or play games. It is really that easy!

Sleep also helps a lot. Sleep helps people to learn in two ways. A report explains that people without enough sleep cannot pay attention well, so he cannot learn *efficiently*(高效地). It also says that sleep itself plays a role in improving memory, which is important for learning new information.

Now you have two suggestions for how to learn new information. Try to get some wakeful rest after a study. Then try to get a good night's sleep. That's it — a simple, no-cost way to help you remember what you learn.

55. What should students do to improve their learning after studying?

- A. Spend time watching TV.                      B. Start to play a video game at once.
- C. Go to bed and have a good sleep.

56. Which of the following is a “wakeful rest”?

- A. Playing games.                      B. Watching your phone.                      C. Resting quietly.

57. What's the main idea of Paragraph 4?

- A. Sleep helps people to learn well.                      B. Sleep is important to kids.  
C. People have to get enough sleep.

58. What would be the best title for the passage?

- A. How to Have a Good Rest.      B. Things to Do after You Study.      C. How to sleep well.
