六、One possible version:

Changes in My Life

How time flies! It has been two years since I went to the middle school. I found that there were two main changes in my life during the two years.

On the one hand, I have become better at dealing with problems. It used

to be difficult for me to make new friends. Then I found out the reasons. Now, I have a lot of friends.

On the other hand, I have become much more confident. In the past, I was worried that I couldn't do well in my lessons. However, with the help of my teachers and classmates, now I do well in all the subjects.

I like these changes. They can make my life better than before.
