For school students, making a homework plan (计划) is important. It can help you do your homework well.

First, be sure to understand what your teachers want you to do. Write it down in your notebook or planner if you need to, and be sure to ask questions about your homework if you really don't understand. It's much easier to take a minute to ask the teacher in or after class than to think hard all the night!

Second, use any free time in your classroom to work on your homework. Many schools have study halls. It's interesting to play with your friends and classmates after class at school, but the more work you do in school, the less you'll have to do that night.

Third, **pace (调整节奏)** yourself. If you don't finish your homework at school, think about how much you have and what else is going on that day, and then plan your time. Most school students have between 1 and 1.5 hours of homework at night. If it's a day with less homework, you can enjoy yourself more, **or** you'll have to say sorry to your game show or movies on TV.

71. There are _____ steps (步骤) to make a homework plan.

- A. two B. three C. four D. five

72. How many hours do most students need to do homework at night?

- A. Between 0.5 and 1 hour. B. Between 1 and 1.5 hours
C. Between 1.5 and 2 hours. D. Between 2 and 2.5 hours.
