题目 1

People need to live in a healthy environment, but there are many pollution problems around us. There are lots of cars on the roads. They use so much oil and cause air pollution. It's harmful to our health. The river is also polluted by rubbish, and it makes the fish die.

As teenagers, we should do something to save the earth. For example, walk or cycle when we go out. Turn off the lights when we don't need them, in this way, we can save energy. Also, it's better to use china cups or cloth bags because they can be used many times. What's more, we should recycle rubbish because it can help us to protect the environment.

I think if everyone does a little, we can make a big difference to build a happier world.

题目2

Everyone meets problems in life. My English was always very good when I was in primary school, so I had confidence in myself. Unexpectedly, I failed in the first English exam in junior high school. After the exam, I felt very upset and had no spirit to do anything. I couldn't even look at the teacher in English class. One day, my friend told me that I was not as happy as before. I suddenly realized that I needed to make a change.

I talked with my English teacher about the problem, then my teacher gave me some advice on how to learn English and encouraged me a lot. I made a plan after the talk. For example, I answered questions in every English class. And I asked my teachers and classmates for help for the questions I didn't understand. I also did more exercises after I finished my homework. Day by day, I made progress in English and I also became happier.

Through this experience, I have learned that when we meet problems, don't run away. We should face the problem and try to solve it in many ways. By dealing with the problems, we will grow rapidly.
