70. were you absent from 71. playing tricks on 72. communicate with 73. talks back to

74. have a point 75. dance to it

VIII. 参考范文:

Recently, we had a discussion about whether we like to wear clothes with Chinese brands or foreign brands. Some students like to wear clothes with Chinese brands. The most important thing is that they are more comfortable. Also, they have a lower price, so they can afford them. What's more, they have meaning of culture.

However, some students think differently. They prefer clothes with foreign brands. That's because they are more fashionable, which can make them feel good about themselves. Another reason is that they have a better quality.

As for me, I always wear clothes with Chinese brands. For one thing, it's normal for a Chinese to choose products made in China. For another, wearing clothes with Chinese brands makes me proud of China.
