The first question is about understanding English films and songs. Li Hao from Hubei wrote, “I like watching English films and 42 English songs, but I don’t understand very much. What can I do?” Watching films and listening to songs are great ways to learn English! You can watch and listen 43 times, and try to guess the meaning of the new words. Each time you will learn something new. I also advise you to talk 44 the films or songs with your friends.

The 45 question is about speaking. Wang Fan from Jilin wrote, “Our school has a teacher from the US. I am shy and I am 46 to speak to her. What should I do?” You can say, “Hello! How are you?” “Do you like China?” These are good ways to start a conversation. And before you begin, you should smile 47 her! Remember this: Do not be shy. Just try.

The third question is about vocabulary(词汇). Zhang Lei from Anhui wrote, “I write 48 new words, but I forget them quickly. How can I remember them?” Do not worry. It is 49 to forget new words! I suggest you write four 50 five words a day on pieces of paper and place them in your room. Read the words when you see them, and try to use them.

Did you imagine(想象) the future life before? We interviewed a few students in No. 1 Middle School. Let’s have a look at their answers.

Mary: I think the life in the future will be better than now. Students won’t go to school. They will study at home on computers. In this way, students will have more free time. Then they will spend more time together with their family.

Jeff: I am worried about the future. There will be more people in the future because the one-child policy (独生子女政策) is canceled. The world will be more crowded. There won’t be enough places to live in. So people will build more buildings. If this happens, there will be fewer places for animals to live in. Many animals will be in great danger in the future.

Candy: I like traveling best. I believe that people will be able to travel to other planets, like Mars (火星) and Mercury (水星). Maybe people will be able to live to be 200 years old. And they will even be able to live under the sea.

Different people have different predictions about the future. Will there be world peace? Will we build a city in the sky? We should try our best to build a better future for both human and nature.
