Life in 20 Years

My life will be very different from now in 10 years. I will be an English teacher and work in one of the best middle schools in Guangzhou. I will live at school because I want to spend more time with my students and be their best friend.

In order to achieve my dream, I will work hard from now on. First, I will listen carefully and answer questions actively in class. Second, in my spare time, I will take more after-school activities like singing and drawing. They will help me be a better teacher.

Let's study hard and I believe our dreams will come true!
