Technology also helps 44 to know more about their children. For example, if a child is given a mobile phone with a tracking (追踪) device, his parents can find out 45 he is going with the help of the mobile phone.

However, there are also some bad 46 of technology. For example, it has become easier for bad people to get in touch with children with the help of technology. So it is very important for parents to 48 their children to keep personal information safe while surfing the Internet.

Besides this, there is another bad thing about technology. Children now 49 less time doing exercise than before. They are too 50 playing online games. They can even play computer games all day long. Most people agree that a pet brings more happiness to a person's life. Scientists are now finding that having a pet may keep its owner healthy. And good health may let a person live longer.

Scientists have been studying the connection between pets and health for years. A study was done with people aged 65 and the older in 1990. It shows that pet owners go to the doctor less than people without pets. Do pets make people happier? Do they help people live on their own longer? If the answer _____ these questions is yes, then having pets may be a good idea.

Can pets really help people live longer? Rebecca Johnson did a survey to find out the answer. Johnson taught nurses how to care for the older people. She shared the findings of her study at a meeting about pets and the aging. Her study shows that having pets may cause people to age more slowly.

The human body makes many chemicals(化学物质). Some of the chemicals make people feel good. Others make people feel bad. In Johnson's study, levels of the good chemicals will rise when people are around pets. Levels of the "bad" chemicals goes down. The good chemicals seem to slow the aging of cells(细胞). If this is true, maybe people should spend more time with their pets. Then the levels of good chemicals will go up. People might feel better and age more slowly.
