#### 四、阅读理解。

This year the weather was quite different from the others. In spring it was very warm. It made the flowers come out early. It was too hot in summer. There were about 40 days above 38 °C. This autumn lasted from September to December. Even in November you could see somebody with a short T-Shirt walking on the street. In winter it didn't last for a long time and it wasn't very cold so that we didn't see snow this year. It was quite unusual. These changes are mostly because of the rise of the temperature (温度) all over the world. We must keep our earth clean so we can have a usual life.
