第三节：听独白，回答问题。独白读两遍。

A primary school called Jingwai Mingde has become popular recently. The school is in Yunnan Province. It provides free meals for its students.

Each class in the school has a piece of land to plant vegetables or raise animals. Students do farm work during the class twice a week with the help of the teachers.

The school has set up a greenhouse with fruit trees for students to learn about nature, instead of listening to teachers in the classroom. There is also a zoo in the school. It keeps deer, ostriches (鸵鸟) and other animals to help students get along with animals.

“The farm work helps the students build excellent characters,” said school head teacher, Lei Yingfei.

Do the students like the school? Sure, they really enjoy the colorful school life — growing vegetables, eating healthily and playing with animals — they can do all these at school.

**Last week, I took part in the activity, Classic Review, organized by the English club.** We watched the movie, Robinson Crusoe. From the movie we knew Robinson once lived on a lonely island for over 20 years but never lost heart. After that, we talked about his spirit. Finally, we were asked to dub to the movie, which really brought us great fun.

I think this is a meaningful activity. It not only opens my eyes but also makes me know more about dubbing skills. What's more, I've got a deeper understanding of Robinson's spirit — no matter what difficulty we meet, we should face it bravely instead of giving up.
