One possible version:

... The Earth Day is coming. There is only one earth, so it's our duty to protect it.

Some environmental problems are still annoying us, although we have made great progress in improving the environment. For example, in my hometown there are sandstorms in spring. Some factories are still pouring waste water into the Yellow River and the waste of energy is serious.

In order to make the world better, everyone should play a part in protecting it. First, we can make posters to tell people how to save the earth. Second, it's a good way to plant a large number of trees to keep the water and soil. We could also save energy by riding a bike instead of taking a car.

I believe our environment will be better and better as long as we do our best to protect it.
