阅读下面短文，根据短文内容完成表格信息，并将答案写到答题卡上相应的位置。

We need animals. Every animal has its place in the balance(平衡) of nature. We should try to protect the animals.

Some people think zoos are good places. The zoos give the animals the comfortable and safe living places. If the animals get hurt or ill, people will take care of them. The zoo is a good place to know the rules in the wild world. We can be much closer to nature. We can know more about the animals in the zoos by watching, listening even smelling instead of just looking at the pictures in books.

Some people don't think animals feel happy in the zoos. Animals like pandas, wolves and bears usually live in the wild. They play and find food by themselves. They are free and happy in the wild. If they are in the zoos, food is enough and rooms are comfortable. They do not need to do their best to find food to eat or places to stay in. They just walk around, sleep day and night, but they are not free at all.

I think we should build national parks as wild life nature reserves to help save animals. If we do nothing, animals will get fewer and fewer.

Help save the animals	
In the zoos	People will look <u>71</u> the animals if they get hurt or ill. People can be much <u>72</u> to nature. Animals don't <u>73</u> about their food or rooms.
In the wild	Animals play and have to find food by <u>74</u> .
