### VII. 完型填空 (每题 1 分, 共 10 分)

When I was young, I lived in Japan for five years. At the time when I came back to China, I could speak 41 very well. I really wanted to do something 42 with my Japanese. Then, this summer I got a chance.

My father bought me a Japanese book and said, "Why don't you translate it into Chinese? It will be 43 than playing games all day." I thought it was a good idea and 44 to translate 2,000 words each day.

But soon I found it was 45 to do so. One day in August, the weather was fine. I wanted to go out for fun but I couldn't, because the 2,000 words were still waiting for me. After translating only three pages, I totally lost 46 in the book. It seemed that there were two people 47 in my mind. One said, "Don't stop! 48 working hard and you will do the work well." But the other said, "Go out and play. It

will be more interesting than translating at home." At that time, I just wanted to 49. But then I remembered what my father had told me, "Whatever you do, don't stop halfway." So I sat down and went on translating the book 50. At last, I made it.

I think I have learned a lot from the experience. From then on, I always try my best to do everything well.

Almost all of us have watched the movie "Jurassic Park"(侏罗纪公园), but how much do we really know about the creatures(生物) called "dinosaurs"? Here is something you may not know about them.

#### About sizes

- Dinosaurs have been considered the biggest living things. But in fact, the blue whale(蓝鲸) is bigger than any dinosaur at 108 feet(英尺) (about 33 m). Many people may think dinosaurs were massive, but they were usually as small as human or even smaller.
- The smallest dinosaurs that we know of were just 4 feet and weighed less than a chihuahua(吉娃娃).
- A newborn human baby has a bigger brain than most adult dinosaurs had.

#### About names

- The word "dinosaurs" belongs to the ancient Greek and means "terrible lizard". That's not a nice way to call someone, by the way.
- The fossil of the dinosaur with the longest name was found in China. Its name is: Micropachycephalosaurus.
- Not everything with "saurs" was dinosaurs, like flying pterosaurs weren't dinosaurs at all!

### About dinosaur babies

- The smallest dinosaur egg is only 3 centimeters long and weighs 75 grams.
- The largest dinosaur eggs are around 19 inches long.
- Most dinosaurs' eggs are just the size of a basketball.

### Others

- Most dinosaurs can be known about by just looking at their bone or tooth.
- The modern relative of T-Rex(霸王龙) is Chicken! We are eating "dinosaurs".
- Some scientists, based on bone evidence(证据), have found out that many dinosaurs lived up to 70-300 years!
- Dinosaurs lived everywhere, even in Antarctica(南极洲).

- ( ) 57. What does the underlined word "massive" mean in the second part?
- A. Huge.                      B. Tiny.                      C. Strong.                      D. Weak.
- ( ) 58. What is **TRUE** about dinosaurs according to the passage?
- A. Everything with "saur" was a dinosaur.
- B. Dinosaurs have the biggest brains of all living things.
- C. The smallest dinosaurs weighed less than a chihuahua.
- D. Dinosaurs' eggs were much bigger than a basketball.
- ( ) 59. What can we learn from the last part?
- A. T-Rex is a kind of chicken.                      B. Dinosaurs used to be everywhere.
- C. All dinosaurs lived up to 300 years.                      D. It's very hard to know about dinosaurs.
- ( ) 60. What might be the best title for the passage?
- A. Different kinds of dinosaurs.                      B. Human beings and dinosaurs.
- C. Dinosaurs around the world.                      D. Interesting facts about dinosaurs.
