- 七 One possible version:

Protect the earth and love animals

Good morning, everyone! Today I am very happy to be here to give a talk about protecting the earth and loving animals.

The earth is our home, and animals are our friends. We share the same home with nature. However, we are facing many different serious problems. People cut down trees and forests, so lots of animals have nowhere to live. Moreover, some hunters kill animals for their bones and furs to make money. Some natural disasters happen more often than before. We should take action right away. The government should make laws to protect some wild animals. As students, we should also plant more trees to provide them with more living areas.

In my opinion, it is important for everyone to play a part in protecting our earth. If we do nothing, there may be few animals left.

That's all. Thanks for your listening!
