83. What makes you so happy?

84. The number of people is up to 200.

85. The boy likes to play jokes on his friends.

86. (15 分)One possible version:

Good afternoon, everyone! My family and I do small things to improve the environment.

First, we use public transport often. My parents drive their cars less and ride shared-bikes more. I take a bus to school. Second we save water by turning off the water while washing vegetables and fruit in a bowl of water instead of leaving the water running. We also save water by reusing it. For example, when my mother finishes washing the clothes, she uses the water to clean the floor. Last but not least, we try to reuse things. For example, when my mother goes shopping, she always takes home-made bags which are made out of our old clothes. As for my father, he uses a china cup instead of a paper cup to drink water.

That's all. Thanks for listening!
